SUMMARY

Software Engineer and Machine Learning Developer with strong expertise in Python, PyTorch, Flask, Django, NLP, Computer Vision, and full-stack web systems architecture.

EDUCATION

Usman Institute of Technology - Bachelor of Science in Software Engineering (2021 - 2025)

Govt. Degree Boys College Johar - Intermediate Pre-Engineering (2019 - 2021)

The Educator School - Matriculation Computer Science (2006 - 2019)

SKILLS

Languages: Python, JavaScript, SQL, C++, HTML, CSS

Frameworks: Django, Flask, PyTorch, Scikit-learn, OpenCV, React, Node.js

Tools: Git, Docker, Figma, Canva, Photoshop, MySQL, PostgreSQL, Linux

Core Competencies: Machine Learning, NLP, Computer Vision, TF-IDF, Vector Search, Algorithms

EXPERIENCE

Machine Learning & Software Developer Intern - Tech Solutions (2023 - 2024)

- Designed and deployed predictive AI classification models and automated attendance pipelines.
- Built microservices integrating OpenCV and K-Nearest Neighbors for sub-second recognition.
- Developed REST API endpoints and database synchronization routines with Flask and MySQL.

PROJECTS

Resume Rater (RR): ATS scoring engine evaluating resumes against job descriptions with TF-IDF.

FaceTrack Attendance System: Flask and OpenCV facial recognition attendance system.

Emotion Entertainment (EmoEnt): Machine Learning and NLP app analyzing emotional tone from text.

Learning Management System: Web-based educational platform with Django and relational DB.

Boiler Management System: Automated remote boiler monitoring and telemetry pipeline.
