SUMMARY

Principal Full Stack & Distributed Systems Software Engineer with expertise in TypeScript, React, Node.js, Next.js, PostgreSQL, Go, and high-availability cloud architecture.

EDUCATION

University of Washington - Bachelor of Science in Software Engineering (2017 - 2021)

SKILLS

Languages: TypeScript, JavaScript, Go, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Recharts, Redux Toolkit, WebGL

Backend & Data: Node.js, Express, PostgreSQL, Redis, GraphQL, REST APIs, Kafka

Infrastructure: AWS, Docker, Kubernetes, Terraform, CI/CD, Linux Systems

EXPERIENCE

Senior Software Engineer - Stripe (2022 - Present)

- Built reactive developer dashboards and real-time streaming transaction visualization tools.
- Engineered distributed idempotent API contracts handling high concurrency and throughput.
- Championed component accessibility standards and end-to-end performance budgets.

Full Stack Software Engineer - Vercel (2021 - 2022)

- Developed edge runtime features and developer telemetry dashboards in Next.js and TypeScript.

PROJECTS

Live Analytics Platform: Distributed real-time metrics visualizer using React, WebSockets, and Redis.

Multi-Cloud Secret Federation: Zero-trust secrets manager and CLI tool built in Go.
